Submission Date: 30 Dec 2025

## **Project Objective**

Develop a To-Do List Web App using Django with Raw SQL, REST APIs, Docker support and testing.

## **Requirements Implemented**

- ✓ CRUD Tasks
- ✓ REST APIs
- ✓ SQLite + Raw SQL
- ✓ Template based UI
- ✓ Docker Deployment
- ✓ Automated Testing

## Architecture

***UI → Views → Service Layer → Raw SQL → Database***

Clean separation of layers for easy maintainability.

## **API Documentation**

- ✓ GET /api/tasks/
- ✓ POST /api/tasks/
- ✓ GET /api/tasks//
- ✓ PUT /api/tasks//
- ✓ DELETE /api/tasks//

## **Testing Summary**

- ✓ Task List UI — PASS
- ✓ Add Task UI — PASS
- ✓ Update Task UI — PASS
- ✓ Delete Task UI — PASS
- ✓ API JSON /api/tasks — PASS
- ✓ Automation (pytest) — PASS

## **Conclusion**

Backend fully functional and ready for demonstration.
